

What is InfoTrac College Edition and why is it adopted?

Professors adopt textbooks with InfoTrac College Edition because it **saves time and money** for students. When students purchase a new Thomson textbook with InfoTrac College Edition, they gain access to an online library filled with over 15 million full-text articles from over 5,000 scholarly and popular periodicals. Essentially, students can browse and print articles from their home computer instead of going to the library. By replacing expensive readers and journal subscriptions, InfoTrac College Edition also saves money.

Why do students use InfoTrac College Edition?

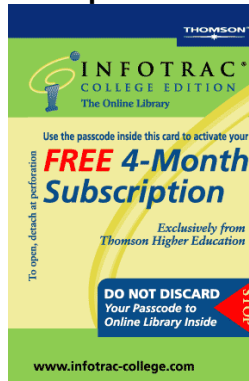

- Simple to use
- Free of advertising
- Available 24/7 from any computer with Internet access
- ALL articles are full-text and can be printed/emailed
- Supports any course
- FREE!

Students also receive free access to InfoWrite, a guide to effective writing that assists students through difficult areas of research writing, such as creating introductions and conclusions, using correct grammar, and writing a thesis.

How do the access codes work?

InfoTrac College Edition can be bundled FREE with any new Thomson textbook. Each new textbook will have a bound-in or shrink-wrapped passcode card, which provides unlimited access to InfoTrac College Edition for four full months (see card examples below). Students can register their passcodes by going to www.infotrac-college.com and clicking on Register New Account. The passcodes are good for one student only, non-transferable, and cannot be resold if opened. For technical assistance, student and professors can email tl.support@thomson.com.
